**Electronic, Optical and Magnetic Properties of Materials**

This book integrates materials science with other engineering subjects such as physics, chemistry and electrical engineering. The authors discuss devices and technologies used by the electronics, magnetics and photonics industries and offer a perspective on the manufacturing technologies used in device fabrication.
The vast majority of all the data we download is stored magnetically in huge data centres across the world, linked by a network of optical fibres. Obstacles to further progress with the internet are three-fold, specifically the speed and energy consumption of the semiconducting or magnetic switches that process and store our data and the ...
